MOTOR WHEEL CATALOG 634

a comprehensive sales tool

This catalog lists wheels and attaching parts for every automobile and light truck manufactured since 1949, plus many earlier models. It has been prepared with you in mind . . . there are many innovations which make it the most comprehensive sales tool ever produced by a wheel manufacturer. Here's why:

**full
coverage**

Part numbers for all wheel and attaching part applications are included regardless of the original equipment manufacturer.

**universal
"X" numbers**

Every application has been assigned one number . . . an universal "X" number. The X-number is all that is required to order new wheels or attaching parts. The X-1000 series covers the appropriate manufacturers' attaching part numbers; X-40000 series, passenger car wheels; X-45000 series, light truck wheels.

**complete
application
listings**

Two types of application listings are provided. The first is "Application by Make." This section is broken down by makes, such as Ford, Mercury and Lincoln, then subdivided by models. Chevrolet, for example, is subdivided as follows: Standard Size, Chevy II, Corvair, Corvette, 1/2-Ton Trucks, 3/4-Ton Trucks, 1-Ton Trucks. The second application listing is entitled "Application by Mounting." This section allows you to select the correct wheel for special equipment. They are listed by the number of bolt holes and the size of the bolt circle.

**thorough
cross
references**

There are three types of cross references. The first is X-Numbers to Motor Wheel, Kelsey-Hayes and/or Budd numbers. The name of the applicable car manufacturer is also included. The second is Motor Wheel Numbers to X-Numbers. It lists all Motor Wheel numbers, including numbers no longer supplied for service. If a number is no longer supplied, the replacement number is given. The applicable car manufacturer is shown. The third is Manufacturers' Numbers to X-Numbers. Manufacturers' numbers are listed numerically by make.

replace worn drums with
Motor Wheel's famous

Centrifuse® brake drums

You can't beat this drum because iron is fused to a tough steel jacket for extra strength. Available for popular cars and trucks.
